LEARNERS/STUDENT FEEDBACK ANALYSIS

The University has adopted a multi-pronged approach to enrich the academic experience of learners by effective use of online and digital technologies for teaching-learning purpose.

UPRTOU learners who have enrolled in various programmes i.e., Certificate, Diploma, Bachelor, Master Degree, and other programmes participated in the feedback survey.

The questionnaire was drafted at CIQA. The Questionnaire was divided into three parts. The *first* part comprised of the basic or demographic information of the learners and the *second* part was related to the feedback of learners asked to respond the given statements either **Yes** or **No** *or five scale likert scale.*

The student feedback form sent is a survey that is used to collect feedback from students about their learning experience. The form includes questions about the instructor, the course, the curriculum, and the overall learning environment.

1. The feedback form is divided into three sections: assignments, and overall difficulty.
2. About the Learning Environment: This section asks questions about the classroom environment, the resources available to students, and the overall support provided by the instructor and the institution.
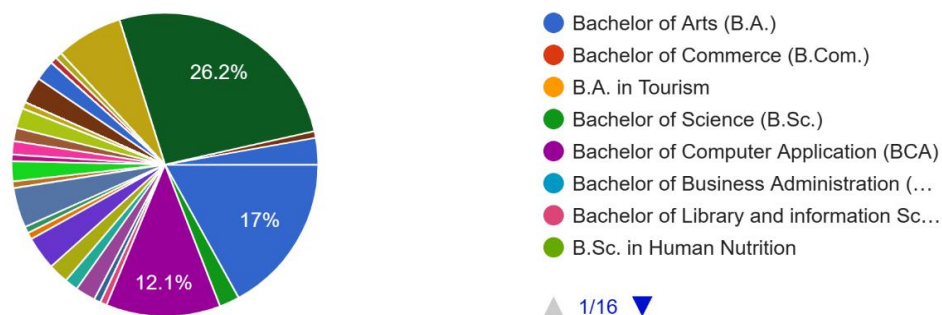

The feedback form also includes a section for students to provide open-ended feedback. This section allows students to share their thoughts and suggestions on any aspect of their learning experience.

Student feedback is important because it can help instructors and institutions to improve the quality of teaching and learning. The feedback form can be used to identify areas where improvement is needed and to track progress over time :

By collecting and analyzing student feedback, instructors and institutions can make informed decisions about how to improve the quality of teaching and learning.
